(Business Processes and Regulatory Compliance

Need for SLR

This SLR is undertaken as a sprelude to further research.

- What are the review's objectives?
- What sources were searched to identify primary studies? Were there any restrictions?
- What were the inclusion/exclusion criteria and how were they applied?
- What criteria were used to assess the quality of primary studies?
- How were quality criteria applied?
- How were the data extracted from the primary studies?
- How were the data synthesised?
- How were differences between studies investigated?
- How were the data combined?
- Was it reasonable to combine the studies?
- Do the conclusions flow from the evidence?

Title ([Lokin 2020](#))

Definitions

Regulatory Compliance

Business Process Management

Agility

** Create Zotero(?) report whereby I get abstract, methodology etc. of paper.

Keyword (from articles)

“Regulatory Compliance” A Semantic Model Based Framework for Regulatory Reporting Process Management Author keywords: Events, Process extraction, Regulatory reporting, Semantic technology Prominence percentile 99.023 (shows the current momentum of a Topic, i.e. very high)

I want to expand the number of SLR to 10 by including SLR’s from A-star journals in the BPM/IS field(s).

To demonstrate International Research Collaboration (IRC), “using affiliations listed in publications has become the standard practice” . I would like to use this to show the affiliations of the authors of the articles included in my literature research.

Concepts mentioned in the article:

- Data quality (DQ) and Data quality assessment (DQA)
- Functional Requirements for Bibliographic Records (FRBR)
- Zotero Data quality dimensions (DQDs)

In the article above DQ is split into:

- Intrinsic Data Quality (4 attributes)
- Contextual Data Quality (5 attributes)
- Representational Data Quality (4 attributes)
- Accessibility Data Quality (2 attributes)

Note: in this study Microsoft Academic Graph (MAG) is one of the four datasources considered. MAG has since been [retired](#).

This is a Quarto book. It contains x sprints that shall cumulate in the litreview.

- Include citations count
- Include authors count
- Include affiliations count

Document attributes:

- the number of tables is total{table}
- the number of figures is total{figure}
- the number of references is total{citenum}
- add list of tables
- add list of figures
